

Certificate

for

Novatek Green Energy

To balance the emissions of Scope 1, 2 and select Scope 3 emissions, including the end use of LNG at the refueling station in Rostock, Novatek Green Energy offsets

5,076 tonnes of CO₂e emissions.

This certificate confirms that these emissions were offset by emission reductions in the VERIFIED CARBON STANDARD, through the climate protection project

[Wind Power Project in Gujarat, India.](#)

First Climate has permanently retired the corresponding emission reduction certificates irrevocably from the market.
